

ADSL BROADBAND.

PRODUCT SHEET

Everything you need from broadband, at a great price

Our cost-effective ADSL broadband solution offers your customers optional network resilience, fast speeds and improved reliability with 99.9% network availability. Delivered using a copper line between the exchange and the customer's premises, where possible we automatically provide connectivity using the 21CN network, giving you access to the fastest speeds available.

SECURE SERVICE, NO MATTER WHERE FROM.

We offer private ADSL lines that are specifically designed for businesses wanting to securely connect home workers or branch offices to the main office network. This secure connection to your network uses the same firewalls and security policies as your central site, reducing the risk of attack from viruses and other potentially damaging threats.

KEY FEATURES.

Multiple data packages available

12-month contract

Up to 20MB download, 1.2MB upload
