

ETHERNET.

PRODUCT SHEET

Fast, reliable and competitive solutions for busy businesses

Provide your customers with a fast, direct connection to the internet, designed with resilience and flexibility in mind. Dedicated to the needs of the business, it can handle all voice traffic, servers and cloud-based software required. Complemented by full line monitoring, 100% SLAs and personalised professional services support for your business, choose from either Fibre Ethernet or Ethernet over Fibre (EoFTTC) options.

FIBRE ETHERNET VS. EoFTTC

Fibre Ethernet, as the name suggests, uses a purely fibre connection, whereas EoFTTC utilises existing circuits with a combination of copper and fibre to provide quicker install times. Ethernet is perfect for those business with high capacity and high-performance requirements, and EoFTTC provides reliability at a great price.

KEY FEATURES.

Ethernet 10Mb,
100Mb, 1Gb

EoFTTC up to
35Mb

Cisco managed
hardware

Monitoring and
proactive alerts as
standard

100% availability
SLA and optimum
fix times

Personalised UK-
based support

HOW IT WILL BENEFIT YOUR BUSINESS.

Traffic Termination Options

Direct to Internet, private interconnects for your cloud services and hosted applications or directly to your data centres.

Sentinel

Real-time line monitoring with proactive alerts to give you complete control of your provided service.

UK-based support

Dedicated account management and professional services support tailored to your business needs.

HOW IT WILL BENEFIT YOUR CUSTOMERS?

Increased Productivity

Exclusive use of the connection optimised for the latest cloud and hosted services. Identical upload and download speeds are ideal for supporting high-bandwidth applications such as video, VoIP and off-site hosted data access.

Guaranteed Consistency

An industry-leading 100% availability SLA and optimum fix times means that your connection will always be resilient, reliable and at the speed you demand. A choice of failover options also provides added security, and we'll automatically redirect traffic in the event of a line failure so your business stays connected.

Total Control

Monitor usage and performance through dedicated access to your own powerful, easy-to-manage portal. Our cutting-edge Sentinel system also offers proactive alerts by SMS, email or phone call in the unlikely event of any line outages.

Complete Flexibility

Upgrade bandwidth with ease and plan ahead for busy periods and increase your bandwidth at any time if you're expecting high volumes of usage over a short period, or if your business is seasonal.

WHY CHOOSE NASSTAR CHANNEL?

Everything you need for you and your customers, right there in black and white
