

IP VOICE CONNECT.

PRODUCT SHEET

Flexible, low cost inbound and outbound call solution

Start your customers on the road to a fully IP-based communications solution with our scalable IP Voice Connect service. Compared to traditional PSTN/ISDN lines, you can pass on cost-savings and continuity benefits to further support your customers. We take care of the provisioning and service support, with expert technical help available whenever you need it.

WHAT IS IP VOICE CONNECT?

Our IP Voice Connect service is an IP-based voice solution made up of several IP Voice channels that are delivered to your customers' premises over one of our Broadband or Leased Line connections.

Our IP Voice Connect service lets your customers continue providing both inbound and outbound voice telephony calls to their own customers, suppliers and the wider PSTN community utilising existing PBX. We also provide compatibility with most leading PBX's directly or with an approved SBC fully tested with our platform. We can undertake bespoke interoperability testing if required.

Value for money

Easy and quick install

Support for up to 10 calls per second

Multiple service options available

UK-based support

Existing phone system can be used directly or via and SBC

SIP Channel Bursting (Flexing) -10%, 20% or 30% of committed channels
