

OVER THE TOP VOICE.

PRODUCT SHEET

An OTT IP voice solution for SoGEA and Fibre

For anyone who needs to communicate with customers and suppliers, anyone who takes orders, reservations or answers enquiries over the phone will have to change if they want to continue with their voice services post PSTN switch-off. They will need a VoIP application such as Nasstar OTT Voice.

Using a new or existing “switch-off” compatible connectivity service such as SoGEA (Single Order Generic Ethernet Access) or FTTP, this product allows you to continue to make and receive calls in the same way you have always done, only without the need for a telephone line.

This is an optional product that can be managed and configured separately to the connectivity service. A voice only alternative is also available, single line PSTN replacement service.

As a direct replacement to PSTN and ISDN services, Nasstar OTT Voice ensures your customers don't lose their voice services and are future-proofed.

KEY FEATURES.

Contract options of 12, 24 or 36 months

Reliable, high-quality service

Web portal configuration

Two installation options - standard managed and premium managed

Voicemail, 1471, Call Waiting, Caller Display all included

Retain your phone number and use your existing phone

WHAT IS THE PSTN SWITCH-OFF?

The current Public Switch Telephone Network (PSTN) is ageing and very expensive to maintain. BT Openreach made the decision to end the life of the standard telephone line with the switch off taking place by 2025. With the PSTN closure looming, businesses need to be prepared.

HOW IT WILL BENEFIT YOUR CUSTOMERS.

A reliable, high quality voice service users are used to such as Voicemail and Call Waiting.

OTT IP Voice PSTN Voice Replacement is a direct replacement of your telephone line and ensures you can continue to make and receive calls.

Keep your number by porting your existing telephone number onto IP Voice or have a new telephone number.
