NASSTAR CHANNEL

ETHERNET.

PRODUCT SHEET

## Fast, reliable and competitive solutions for busy businesses

Provide your customers with a fast, direct connection to the internet, designed with resilience and flexibility in mind. Dedicated to the needs of the business, it can handle all voice traffic, servers and cloud-based software required. Complemented by full line monitoring, 99% SLAs and personalised professional services support for your business.

POWERED BY FIBRE.

Ethernet takes advantage of a full-fibre pathway between customer premises and the provider to give an 'always on' connection to the internet with the maximum available speeds, symmetrical upload and download and no contention.

Fibre Ethernet is the best available internet connection without the need to install a customer-specific link, proving enterprise-ready, data heavy capabilities including SaaS and video.

KEY FEATURES.

Ethernet 10Mb, 100Mb, 1Gb

EoFTTC up to 35Mb

Unlimited data

Monitoring and proactive alerts as standard

99% availability SLA and optimum fix times

Personalised UK-based support

HOW IT WILL BENEFIT YOUR CUSTOMERS.

Increased Productivity
Exclusive use of the connection optimised for the latest cloud and hosted services. Identical upload and download speeds are ideal for supporting high-bandwidth applications such as video, VoIP and off-site hosted data access.

Unlimited data
All the data they need for their business requirements with no extra fees and no caps to worry about.

Guaranteed Consistency
An industry-leading 100% availability SLA and optimum fix times means that the connection will always be resilient, reliable and at the speed your customer's demand. A choice of failover options also provides added security, and we'll automatically redirect traffic in the event of a line failure, so your customers stay connected.

Total Control
Monitor usage and performance through dedicated access to their own powerful, easy-to-manage portal. Our cutting-edge Sentinel system also offers proactive alerts by SMS, email or phone call in the unlikely event of any line outages.

Complete Flexibility
Upgrade bandwidth with ease and plan ahead for busy periods and increase your bandwidth at any time if you're expecting high volumes of usage over a short period, or if the business is seasonal.

HOW IT WILL BENEFIT YOUR BUSINESS.

Traffic Termination Options
Direct to Internet, private interconnects for your cloud services and hosted applications or directly to your data centres.

Proactive monitoring
Real-time line monitoring with proactive alerts to give you complete control of your provided service.

UK-based support
Dedicated account management and professional services support tailored to your business needs.
