

SINGLE LINE PSTN REPLACEMENT.

PRODUCT SHEET

Next generation connectivity with an included over the top voice solution to replace your existing single line PSTN

This combined next generation connectivity and over the top voice product is the perfect solution for the replacement of an existing single line PSTN.

This combo is designed to act as a voice only product and for that reason utilises 0.5mbps SoGEA (Single order Generic Ethernet Access) the next generation of data connectivity.

In a world of high-capacity broadband offerings, such a low bandwidth may sound silly but VOIP doesn't not require the bandwidth and 0.5mbps SoGEA is perfect for carrying the over-the-top voice product and ensures your service is ready for the switch off.

Priced in a similar way to the traditional PSTN line, this is a foundation IP Voice product. Alternative over the top voice products are available as optional extras for higher bandwidth next generation and fibre connections.

As a direct replacement to PSTN services, Nasstar single line PSTN Replacement ensures your customers don't lose their voice services and are future-proofed.

KEY FEATURES.

Contract options of 12, 24 or 36 months

Retain your phone number

Reliable, high-quality service

Use your existing phone

WHAT IS THE PSTN SWITCH OFF?

The current Public Switch Telephone Network (PSTN) is ageing and very expensive to maintain. BT Openreach made the decision to end the life of the standard telephone line with the switch off taking place by 2025. With the PSTN closure looming, businesses need to be prepared.

HOW IT WILL BENEFIT YOUR CUSTOMERS.

A reliable, high quality voice service users are used to such as Voicemail and Call Waiting.

IP Voice PSTN Voice Replacement is a direct replacement of your telephone line and ensures you can continue to make and receive calls.

Keep your number by porting your existing telephone number onto IP Voice or have a new telephone number.
