

SoGEA.

PRODUCT SHEET

Protect your business ahead of the switch off with a single line PSTN replacement

Single Order Generic Ethernet Access (SoGEA) is the next generation of data connectivity. Previously you needed a phone line (PSTN) and a separate broadband line installed to access the internet. By removing the need for a telephone line, SoGEA provides a data-only connection without a PSTN service that is ready for BT's PSTN switch off in 2025. Simply put, it means broadband without the phone line.

As traditional phone line installation is not required, costs are reduced, and ordering is made simple. But as the technology is based on the current FTTC technology, SoGEA delivers same performance and data rates.

KEY FEATURES.

Up to 80Mb download and 20Mb upload

Two installation options: standard managed and premium managed

One single solution

SoGEA Voice can be provided as an Over the Top (OTT) service

Available at over 28 million UK premises

Same performance as FTTC

HOW IT WILL BENEFIT YOUR CUSTOMERS.

Fast and easy to install

Your customers can be up and running within 10 working days of ordering.

Better reliability

No phonelines mean there is less chance of interference or an unstable connection.

Unlimited data

All the data they need for their business requirements with no extra fees and no caps to worry about.

Quicker fix times

One provider means faults can be resolved faster and more efficiently.

Future-proof

Helps ensure customer are covered after the PSTN switch off.

HOW IT WILL BENEFIT YOUR BUSINESS.

Future-proof connectivity to prepare your customers for the PSTN withdrawal

Costs and installation times are lower than Ethernet-based connectivity technologies

Equal speeds to FTTC

Quote, order and manage through our Partner Portal

Easy migration journeys

Unlimited data

WHAT IS THE PSTN SWITCH OFF?

The current Public Switch Telephone Network (PSTN) is ageing and very expensive to maintain. BT Openreach made the decision to end the life of the standard telephone line with the switch off taking place by 2025. It is already being phased in and as of 2023 businesses will no longer be able to purchase ISDN lines.

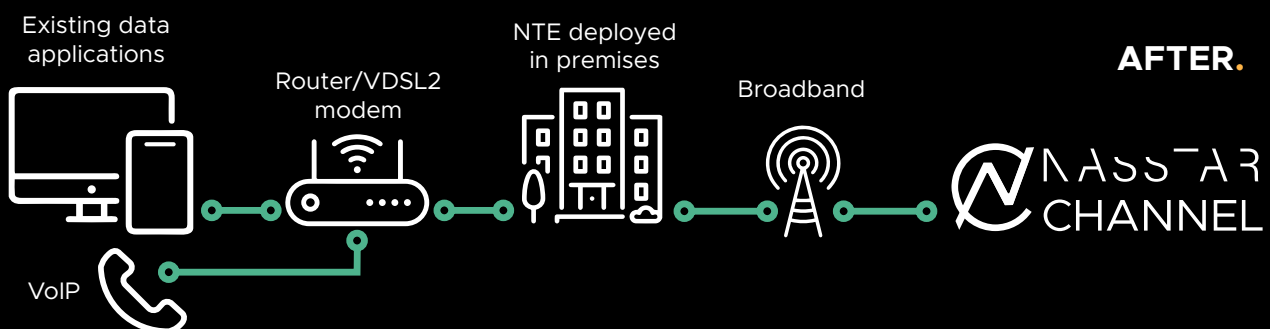

With the PSTN closure looming, businesses need to be prepared.

THE BIG SWITCH OFF.

BEFORE.

AFTER.

WHY CHOOSE NASSTAR CHANNEL?

Everything you need for you and your customers, right there in black and white

We remove the complexity and keep it simple. Our SoGEA solution meets the needs of your customers and provides unrivalled support and experience you can't get anywhere else.

- Established provider with years of experience
- Highly trained UK-based service and support team
- Access to the best expertise and resources
- Tried and tested, innovative products that deliver when you need them to
- Fully flexible options
- Simple on-boarding process
- Dedicated partner portal
- Full commitment and dedication to the channel and its needs

**Passionate
people**

**Innovative
